12:58:22 From Heather Braucher : Good afternoon, Everyone!
13:01:07 From Traci Smith : Hi Heather!!!!!
13:04:57 From Barry Marbach : good for collab with science
13:05:27 From Becca Castleberry : Heather’s presentation materials will be uploaded to the OKAGE website by the end of this week. Here is the link: http://okageweb.org/new-blog
13:12:28 From Barry Marbach : we could use flipgrid as well
13:17:09 From Barry Marbach : I would insist on providing coffee for their teachers in their emergency kit lol
13:17:42 From Amy Curran she/her : Especially the afternoon classes, Barry. ;)
13:21:13 From Becca Castleberry to Heather Braucher (Privately) : Do students ever ask what to do about their pets?
13:21:51 From Brenda Beymer-Chapman : I think this is a great idea Barry - maybe they can also make a PSA for being prepared
13:22:59 From Barry Marbach : PSA is great and a local tv station might even pick up on it
13:23:38 From Becca Castleberry : Amy - I love that idea. It would be great for students to talk with a first responder. Maybe they could provide information on the most common mistakes or misconceptions
13:23:56 From Barry Marbach : Bonus items in their pack Hoping for something different from backpack that can be confused with regular backpack, items to share with homeless in disaster
13:25:47 From Barry Marbach : kids lover their pets
13:27:16 From Barry Marbach : Governor Stitt's Oklahoma Resilience message
13:27:53 From Pamela’s iPhone : triumph over tragedy
13:28:20 From Barry Marbach : compassion room
13:29:58 From Becca Castleberry to Heather Braucher (Privately) : Could you have them do a before and after? So ask them what they would include in their kit before the lesson, then compare their kits at the end to see the differences.
13:30:39 From Barry Marbach : maybe a contact list of important people in their lives best friends
13:31:02 From Barry Marbach : in current pandemic it is useful to check in best friends
13:31:51 From Barry Marbach : #geography stars
13:32:30 From Cesar Pardo : This could fit in when we discuss human environment interaction. Everything is connected.
13:32:32 From Barry Marbach : I like Pamela's triumph over tragedy
13:33:04 From Kristin Walker : I like that before and after idea.
13:33:07 From Kathryn horn : A virtual escape room could take place on Goformative.com
13:34:53 From Amy Curran she/her : You could deeply tie in science with the phenomenon that causes disaster. Sort of the pre part to your WARNING slide
13:36:49 From Pamela Hamman : My grandson had a program I believe the firefighters did it with a emergency kit in a pillow case the were to load it with things needed flashlight ECC the gave the students the pillowcases they had like a coloring page design on it the colored in

class with markers
13:37:41 From Pamela Hamman : I came into the discussion late so your talking about a disaster backpack??
13:38:14 From Amy Curran she/her : Talking about creating an emergency kit/backpack for a specific disaster.
13:38:15 From Becca Castleberry : Yes, we're talking about disaster preparedness and one of the components is preparing a kit of everything they would need in a particular disaster.
13:38:31 From Pamela Hamman to Becca Castleberry (Privately) : got it
13:38:32 From Kathryn horn : I used it in student teaching. you can design it as a board game or something similar. The students would have to answer each correctly before moving on. The students I had gave me positive feedback about the game
13:42:09 From Becca Castleberry : Heather - Have you ever had a student that found this content traumatizing? How would you deal with that in the classroom?
13:42:56 From Barry Marbach : As a veteran I share how to discuss trauma
13:43:33 From Barry Marbach : I also use the google survey for confidential answers to trauma
13:43:45 From Becca Castleberry : That's an awesome idea!
13:44:59 From Becca Castleberry : I would say an obvious one would be to include PPE and extra sanitizer with your kits
13:45:42 From Barry Marbach : I emphasize compassion
13:47:12 From Andrew : I would emphasize being transparent with my students. Telling them that I am nervous and have many questions about all of this, so it is okay for them to ask questions.
13:47:32 From meghanklein : I worked in Houston after Hurricane Harvey. The kids just wanted to be able to talk about what they went through and felt
13:49:09 From Traci Smith : Preview Discussion topic: Learning from history…What did we learn from the sudden quarantine that we can apply to future planning? What we did and what we can do better. Was the toilet paper holding actually necessary?
13:50:01 From Barry Marbach : I like the Hurricane Harvey experience comment
13:51:07 From Traci Smith : LOL
13:51:17 From Traci Smith : That's supposed to say hoarding…sorry
13:52:03 From Becca Castleberry : One last time, this presentation will be available here by the end of the week: http://okageweb.org/new-blog
13:52:26 From Traci Smith : Heather, you're amazing!!! HUGS!!!!!
